

ITANTA

NO CODING REPORTING SOLUTION

Solution Architecture

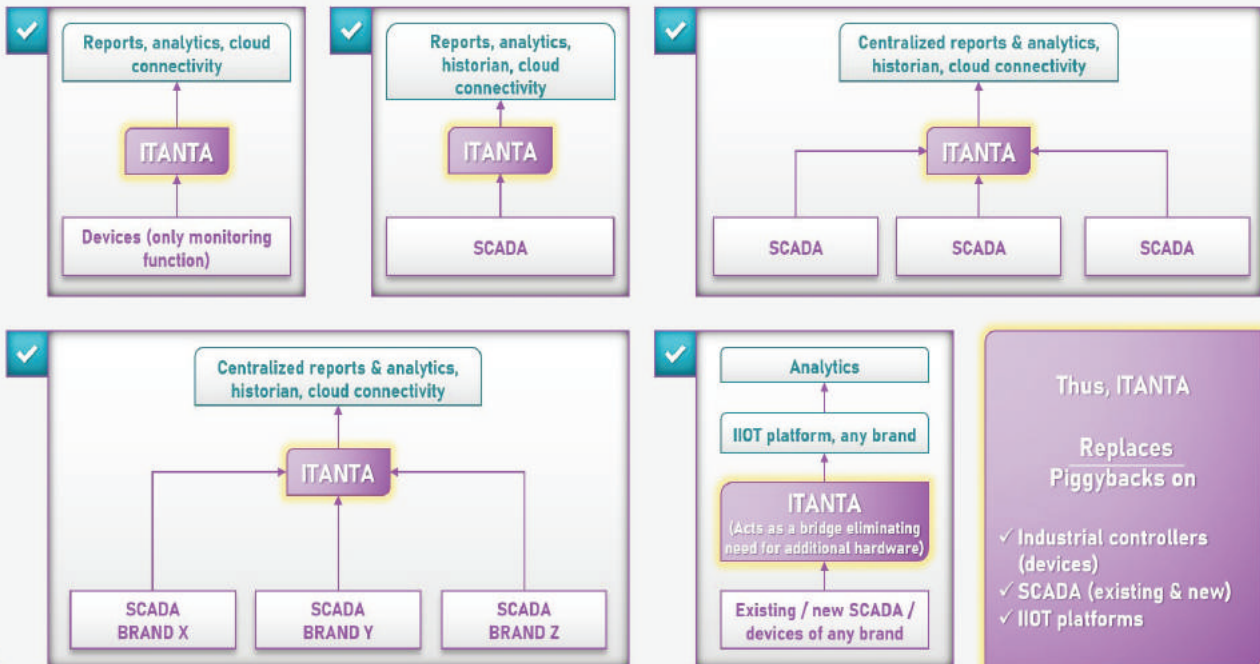

Itanta is a software platform that can connect to any industrial automation system/ device and perform the below functions :

1. Aggregate large amount of production data
2. Provide meaningful insights of the aggregated data
3. Generate and distribute customised reports with necessary compliances
4. Provide data to higher systems like ERP/ Forecasting systems/MES
5. Can be remotely deployed on premise or on any cloud platform

With Itanta, projects can be completed in fraction of time and cost as against current deployments, resulting in big savings for the customers.

Typical Industry Scenarios

Our Solution & Benefits

- Automation Systems agnostic platform by having direct connectors available to many SCADA, historians, databases, Industrial Controllers & Sensors

- Many pre configured report templates available for users to choose from reducing project development time and effort

- Itanta brings time-efficient, coding-free and configurable reporting & analytics solution to the Industrial Automation domain

- Reports and analytics adhering to industry specific regulatory compliances available.

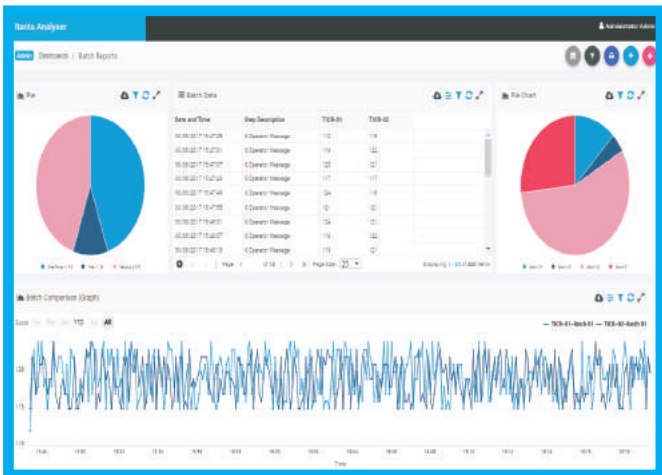

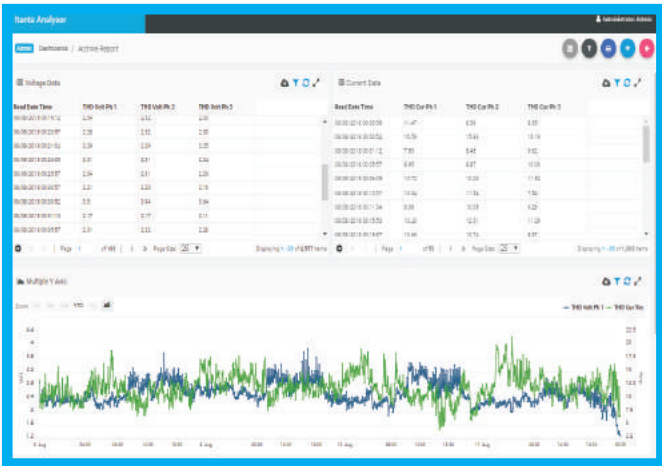

- Itanta software can be used seamlessly with existing automation systems making it ideal for legacy systems as well as for new project deployments.

- Direct connectors to give data to third party platforms like ERP, forecasting systems or MES systems

- Our products can be deployed remotely on premise and on cloud platforms with ease

**Industrial Automation System*

Itanta Solution Available For :

- 1) Bio Technology**
- 2) Food & Beverage**
- 3) Solar**
- 4) Automotive**
- 5) Heat Treatment**
- 6) Energy Management / Foundary Management**
- 7) Pharma**
- 8) Cement / Paper & Pulp Process Industries, Etc**
- 9) Mobility / Transportation**
- 10) Oil & Gas**
- 11) Water & Waste Water**
